16/11/2006	Kitchen	A number of women were concerned that this was perhaps not large enough if we were to hold large scale events onsite. For example Women's Dinners, Men's Dinners and Parish events requiring catering. The question was raised "Is this going to be a commercial style kitchen" with the implication being that this would be desirable. Is this the vision?
16/11/2006	Kitchen	The kitchen's current location, whilst reasonably central does not seem to be close enough to where it would be needed for catering for young children or even youth type events (dinners after F/X, morning tea/lunches for Playtime children and so on). The kitchen is a key component to these ministries and the easier access the better. Has this been considered?
16/11/2006	Toilets	The question was asked: are there enough toilets to cater for a full centre? It looks on initial observation that there are not that many more than there are currently. Is it possible to have more? Or have people toilet ratios been adequately accounted for already?
16/11/2006	Toilets	For crèches, toilets need to be fairly close by due to the age and stage of the children. The toilets on the plan look to be a fair way away from where the young children will be. We really do need toilets close to where the action is, so to speak. Can this be arranged?
